PROFESSIONAL SUMMARY

Senior Flutter Developer with 5+ years of professional experience in developing, modernizing and supporting production mobile applications for social platforms, e-commerce, marketplaces, ERP, POS, logistics, payments, media and business-management products. Experience in Flutter, native Android development, REST API integration, complex business logic, real time communication, live location, payment gateways, multimedia, hardware integrations and third party services. Proven experience of taking applications from UI implementation and integration through debugging, testing, optimization and deployment in production. Experienced in code reviews and coordinating development work with junior developers.

EXPERTISE AREAS

Products & Domains: Super Apps, Social Platforms, E-commerce, Marketplaces, ERP, POS, Business Management, Service Booking, Delivery & Logistics, Payments, Media, Content & Creator Platforms

Engineering: Flutter App Development, Native Android Development, REST API, MVVM, MVC, Business Logic, Real-Time Systems, API-Driven Apps, Performance Optimization, Third-Party Integrations, Code Review, Production Debugging

Mobile & Platform: Flutter, Dart, Android, Java, Kotlin, Swift, XML, Firebase, FCM, WebRTC, Socket.IO, WebSocket, Google Maps, Live Location, Native Platform Integration

TECHNICAL SKILLS

Languages: Dart, Java, Kotlin, XML

Mobile: Flutter, Android, Android SDK, Firebase, Firebase Cloud Messaging, GetX

Architecture: MVVM, MVC, Clean Architecture, SOLID Principles, Provider, Riverpod, Bloc/Cubit

Backend/API: REST APIs, JSON, Firebase, Firebase Realtime Database, Firebase Functions

Database: SQLite, Hive, SharedPreferences, MySQL/API-based databases

Real-Time & Communication: WebSocket, Socket.IO, WebRTC, Live Location, Audio/Video Calling

Payments: Stripe, PayPal, Apple Pay, Razorpay, Paytm

Maps & Platform: Google Maps, Location Services, Background Location, Method Channels, Native Android/iOS Integration

Development: Git, GitHub, GitLab, Postman, Android Studio, VS Code, Agile Development, Testing, Debugging, Production Deployment

PROFESSIONAL EXPERIENCE

Senior Flutter Developer, Bebuzzee Inc. Sep 2023 - Present

Bebuzzee Super App | Social, Media, Commerce and Business Platform

- Built and maintained a large-scale Flutter super app covering social networking, short-form video, streaming, messaging, shopping, property, skilled services, payments, creator monetization, food delivery, taxi services, freelancing, and advertising.
- Modernized an existing production application by fixing authentication, stability, UI, and functionality issues, and implementing new product capabilities across multiple modules.
- Built ShortBuz, a short-form video experience with performance-focused video playback and native platform integrations.
- Developed real time chat and audio/video communication using WebRTC, Socket.IO, Kotlin and Swift with REST API and Firebase integration.
- Integrated payment and subscriptions systems such as Stripe, PayPal, and Apple Pay.
- Re-architected and transformed the Shopping module from a static experience to an API-driven commerce workflow, implemented mobile UI, business logic, and REST API integration.
- Continue hands-on development while assigning tasks, reviewing implementations, testing changes and merging contributions from a junior flutter developer.

Junior Flutter Developer → Senior Flutter Developer | CodeAir Technologies Apr 2022 – Aug 2023

Festival Post & Video Builder | Production Mobile Application

- Developed full Flutter app for designing customizable festival & business promotional designs.
- Created business profiles, template selection, auto-population of business details, template editing, custom design creation, download workflows.
- Added subscription and rewarded video monetization with ad-free usage, unlimited editing, multiple business profiles and premium downloads
- Integrated Razorpay then Paytm for subscription payments, Firebase services, REST APIs, and Firebase Realtime Database.
- Modified Flutter widgets for dynamic template editing and customization.

Basil POS | Restaurant POS & Business Management Platform

- Contributed to the development of Flutter POS features, including restaurant ordering, menu management, pricing, discounts, tipping, payment processing, kitchen operations, cash handling, device setup, KDS, and kitchen printers.
- Implemented API integrations and business workflows in the mobile point-of-sale application.
- Contributed to payment and card-reader workflows, order notes, KDS/printer workflows, device setup, production debugging, bug fixes and continued feature enhancements.
- Supported the product throughout the CodeAir tenure as an ongoing production & maintenance project.

As a Senior Flutter Developer

- Performed hands-on feature development and delegated development tasks for 3 junior Flutter developers.

- Reviewed code, tested implementations, merged completed work, updated management on progress.

Flutter Developer Intern → Flutter Developer → Flutter & Android Developer | CYPHERNATE Nov 2020 – Apr 2022

Petoriz | UAE Pet Products & Services Marketplace

- Built UAE pet products and services marketplace Flutter customer app from ground up using Figma designs.
- Implemented authentication, product browsing, cart, checkout, appointments, stripe payments, saved cards, refunds, payment status, notifications and service reminders.
- Implemented real-time delivery tracking via WebSocket communication and Google Maps.
- Integrated REST APIs, Integrated Firebase/FCM, SQLite favorites, GetX state management
- Worked directly with the client on requirements, issues, and technical discussions and application updates.

Skilled Services Marketplace | US Services Marketplace

- Inherited and redesigned a customer and worker marketplace app with incomplete and non-functional workflows.
- Created customer booking, worker acceptance, job lifecycle, worker verification, live location, navigation, job completion, photo/video proof, reviews, notifications and payment flows.
- Implemented customer and worker real-time synchronization by WebSocket and Socket.IO.
- Payment workflow integration for advance-payment and post-completion payment using Stripe and PayPal.
- Experience with Google Maps, background location, Firebase / FCM, camera and production deployment
- Interact directly with clients and manage Play Store & App Store deployments.

Calcue ERP | ERP for Textile Manufacturing

- Developed Flutter UI and integrated REST APIs for Textile ERP such as Employee Management, Inventory, Job Work, Customer Management, Orders, Payments and Business Operations.
- Implemented business logic and calculations for stock and payments.
- Worked on Zebra QR/barcode scanner integration and resolved hardware data-handling requirements with senior developer.
- Designed and developed scrollable table interfaces to meet large dataset requirements of client.
- Used Flutter, Dart, Firebase, FCM, SQLite, MVVM, REST APIs and Agile development methodology.

Alcohol Delivery Platform UAE | E-commerce & Delivery

- Full Android customer and driver apps developed from scratch to production deployment.
- Built product browsing, cart, checkout, COD, online payment, warehouse pickup, order management, driver acceptance, delivery workflows and live tracking.
- Integrated Stripe, Paypal, social login, Google maps and live location tracking.
- Developed guest-user and gifting flows with varied conditions for checkout and fulfillment.
- Developed the application using Java, Android, XML, MVVM/MVC and Agile practices.

SELECTED PROJECTS

Bebuzee Super App - Social, Media & Commerce Platform

Flutter · WebRTC · Socket.IO · Payments · Native Android/iOS · Firebase

A large scale Super App covering social, media, communication, commerce, payments, services, jobs and mobility.

Live: [Google Play](#) | [App Store](#)

Skilled Services Marketplace — Customer & Worker Service Platform

Flutter · WebSocket · Socket.IO · Google Maps · Stripe · PayPal

Two-sided customer/worker platform with booking, verification, live tracking, job lifecycle, proof submission and conditional payment workflows.

Live: [App Store](#)

Basil POS — Restaurant POS & Management System

Flutter · REST APIs · Payment Hardware · KDS

Production restaurant POS covering ordering, payments, pricing, kitchen operations, KDS, printers and device workflows.

Live: [Google Play](#)

Petoriz — Pet Products & Services Marketplace

Flutter · GetX · WebSocket · Stripe · Google Maps · Firebase

UAE pet marketplace combining product commerce, pet services, appointments, payments, notifications and real-time delivery tracking.

TextBookMe — Student Textbook Marketplace | Freelance Android Project · Canada

Java · Android · XML · REST APIs · Location · Marketplace

Developed an Android marketplace connecting college and university students in Canada to buy, sell, and trade used textbooks and school supplies, including product discovery, seller listings, product details, location-aware experiences, image/file handling, and API-driven marketplace workflows.
